Introducing the new electronic oil management system

TMS air
Oil-Management

Mobile Workshop Solutions by

T TECALEMIT

NEW!

Wi Fi

MADE IN
GERMANY
Durable Quality

In an increasingly digitized world, the organization of the working world has changed rapidly. Technical demands determine the requirements: Easy, effective, and quick.

With the TMS air, TECALEMIT now offers not only a long-established solution for workshops with their own wired system, but now also the ability to manage the centralized oil supply system via the company network (LAN or WiFi).

With the TMS air, TECALEMIT now provides what is a familiar and practical solution, but with the added advantage of being able to connect to the oil management system via WiFi. Using any commercially available tablet or PC (no particular manufacturer or operating system required), clients can access the server

software on their central workstation. This means that you do not need to purchase any expensive, specialized devices.

Key Benefits:
- No extensive wires required - **lower costs for material and installation**
- Plug and play measurement and shut-off units - **guarantee short assembly times and lower installation costs**
- OilControl Eco software included as standard - **easy to use and cost effective start-up for non-DMS interfaces**
- Software upgrades - **provide increased functionality and interface to all main DMS**
- No "own" proprietary tablets - **lower installation and maintenance costs**

TMSair – Hardware

TMS air – The central unit

030 471 300

The TMS air is the next evolution of its predecessor, the TMS III with an independent display and control panel. With this new model, orders can be viewed, selected, and managed from anywhere (e.g. directly from inside the vehicle during a filling procedure) via a tablet.

Key Features
- Wide-range power supply 100 - 240 V
- Steel housing (UL-listed)
- Connector ports for up to 5 measurement and shut-off units
- LAN interface
- USB port for software update
- Optional internal WiFi module

The measurement and shut-off unit

030 366 011

When connected to the TMS air, the newly developed measurement and shut-off unit manages the activation of the fluid supply. The "plug & play" unit guarantees short assembly times, and the compact design allows for space-saving installation.

Key Features
- 24 V low voltage supply
- ¾" BSP with integrated protective filter
- Dual high flow/low flow valves
- High measuring accuracy
- Power cable with locking plug
- Housing mount, small installation dimensions

The LevelController air

030 480 000

The LevelMaster checks the fill levels in the storage tanks via corresponding probes and displays the information in the OilControl software.

Key Features
- Wide-range power supply 100 - 240 V
- Steel housing (UL-listed)
- Connector ports for up to 5 fill level probes
- LAN port/optional internal WiFi module
- USB port for software update

TMSair – The software

Integration into a dealer management system (DMS)

The OilControl software is offered in two variants (eco and pro). The standard version is provided by default along with the TMS air, while the paid full version includes interfaces to various dealer management systems. You can update to the full version at any time.

Key Features
Oil Control eco
- Creating orders
- Assignment of dispensing licenses
- Consumption according to product group
- Dispensing logs
OilControl pro
(In addition to above)
- Interfaces to all popular Dealer management systems
- Fill level monitoring (optional)
